

Interfacing

Fusible / iron on interfacings – not suitable for use on fabrics with embellishments, textured finishes, open work or metallic finishes

Sew in interfacings – suitable for use with all fabric types

Item	Width	Uses	Care Info	Stock Code
Woven interfacings (w) have a lengthwise and crosswise grain and are usually cut on the same grain line as the fabric, allowing the fabric to maintain its natural drape and feel. When cut on the bias woven interfacings will stretch.				
Light weight fusible, 100% cotton - white	90cm	Suitable for use in light weight clothing applications.	50° wash, medium iron, dry cleanable	899 - 411
Medium weight fusible, 100% cotton – white	90cm	Suitable for both light weight and outer wear fabrics.	50° wash, medium iron, dry cleanable	915 - 412
Medium weight fusible canvas, 60% cotton, 40% viscose - natural	90cm	For use in outerwear fabrics requiring a structured look. Ideal for under collars in tailored garments. Use in craft applications to give lighter weight fabrics body and structure.	50° wash, medium iron, dry cleanable	1131
Firm sew in, 100% cotton – white	90cm	For shirt collars and cuffs.	40° wash, cool iron, dry cleanable, tumble dry cool	1217
Heavy weight sew in canvas, 40% viscose, 31% cotton, 21% animal hair, 8% polyester - natural	80cm	For use in outerwear and craft applications. Use in tailoring to provide support and structure to the chest area of jackets and coats, and in craft applications to give lighter weight fabrics firm support and structure.	50° wash, medium iron, dry cleanable	1218
Non-woven interfacings (NW) are made from synthetic fibres bonded or felted together to create different weights. Non-woven interfacings have no grain, so pieces can generally be cut to minimise waste. However, care should be taken when laying out pattern pieces, as non-woven interfacings generally used for dressmaking are stable lengthwise but have a stretch crosswise which varies with the weight of interfacing.				
Ultra soft light fusible – white	90cm	Suitable for use with polyester and light weight cottons, wool, and soft jacket fabrics.	50° wash, medium iron, dry cleanable	423-404
Ultra soft light fusible– black				424-405
Ultra soft medium fusible – white	90cm	Suitable for use with medium weight wool, wool blends, and jacket weight fabrics.	50° wash, medium iron, dry cleanable	719-410
Ultra soft heavy fusible – white	90cm	Suitable for heavier weight outerwear fabrics, wool, and fabrics requiring a more structured look.	50° wash, medium iron, dry cleanable	428-409
Stitch reinforced, soft, fusible – white / charcoal	90cm	Suitable for use on light to medium weight fabrics, use on front panels, lapels, collars, cuffs, and button bands.	50° wash, medium iron, dry cleanable	1606(w) 1605(c)
Medium, crisp handle fusible - white	90cm	Suitable for use with crisp cottons and cotton blends only.	50° wash, medium iron	425-406
Medium, crisp handle fusible - black				426-407
Firm fusible - white	90cm	Suitable for medium to heavier cotton and cotton blends for a firm handle, ideal for waistbands and shirt collars.	50° wash, hot iron	427-408
Light weight sew in - white	90cm	Suitable for use with polyester, cotton, velvet and pile fabrics.	50° wash, medium iron, dry cleanable	420-401
Light weight sew in - charcoal				419-400
Medium weight sew in - white	90cm	Suitable for use with medium weight fabrics, corduroy and velvets.	50° wash, medium iron, dry cleanable	421-402
Heavy weight sew in- white	90cm	Suitable for heavier outerwear fabrics, wool, tweeds and gabardine.	50° wash, medium iron, dry cleanable	422-403
Knitted interfacings (K) – are softer than the woven interfacings, and have more stretch both lengthwise and crosswise. Knitted interfacings can have an additional warp or weft thread to create more stability, making them particularly suited to tailoring, combining softness and stability to provide structure to a garment without compromising the drape or feel of the fabric.				
Weft insertion fusible, 78% viscose, 22% polyester – white / black	150cm	Suitable for use on all weights of fabrics. Provides structure in tailored garments while maintaining the drape and feel of fabrics. Used in speed tailoring.	Dry clean only, medium iron	916 (w) 1408 (b)
Bi stretch fusible – white/black	150cm	For use on very fine or stretch fabrics.	40° wash, medium iron, dry cleanable	1108 (w) 1571(b)
